

## Isoniazid Preventive Therapy for the Prevention of Tuberculosis in People Living with HIV

33764 **Author:** Family Health International/US National Headquarters Office

**Publication Date:** 2012

**Format:** Online Course

**Physical Description:** Online course.

**Language:** English

### Abstract:

This course was designed to give hands-on practice in identifying when and how an Isoniazid Preventive Therapy (IPT) program can be used in the prevention of tuberculosis in people living with HIV. Depending on individual pace and previous knowledge, this course requires around 30 to 45 minutes to complete.
